

FP-Radar: Longitudinal Measurement and Early Detection of Browser Fingerprinting

Pouneh Bahrami, Umar Iqbal, Zubair Shafiq
Privacy Enhancing Technologies Symposium, 2022

Stateful

- Deterministic Identifiers
 - Cookies
 - Local Storage
- Progressively restricted by browsers

Stateless

- Probabilistic Identifiers
 - Unique
 - Stable
- Not a static phenomenon

How to detect evolving fingerprinting techniques?

```
...
function getUserFingerprint() {
  navigator_ditc = {}
  navigator_ditc.cores = navigator.hardwareConcurrency,
  navigator_ditc.languages = navigator.languages,
  navigator_ditc.trackStatus = navigator.doNotTrack
  ...
}
...
```

Fingerprinting Example

JS

Server Side

Tracker Database

# Cores	Languages	doNotTrack
8	["en-US", "zh-CN", "ja-JP"]	False
16	["en-US", "fa"]	True
8	["tr", "en-US"]	True

Measurement and Results

New Findings

Fingerprinting detection is not straightforward

- **Heuristics: pre-defined heuristics [1]**
 - **Laborious and time consuming**
 - **Brittle**
 - **Don't work for evolving/new APIs**
 - **Reactive detection**
- **ML Based: Learn automatically [2]**
 - **Automate and fast process**
 - **Flexible to minor changes**
 - **Don't work for evolved/new APIs**
 - **Reactive detection**

Measurement and Results

New Findings

Temporal Clusters

- **14** temporal clusters
- Detect the fingerprinting cluster(s) based on:
 - % keywords in **fingerprintjs2**
 - Ration of **known fingerprinting** keywords to non-fingerprinting keywords [1]
- **6** potential FP clusters
- The most **dominant cluster** has:
 - Life-span: **9 years**
 - % Common keywords with keywords in fingerprintjs2: **63%**
 - The ratio FP/non-FP: **26.85**

Measurement and Results

New Findings

Sensor API

- `DeviceMotionEvent` and `DeviceOrientationEvent`
- **Sensor API** is continuously being updated
- FP-Radar detected it as early as 2017
- `AmbientLightSensor`
 - **not yet disclosed**

Page Visibility

- Released in 2013
- Provides visibility state
- Ephemeral fingerprinting
- Detected in 2013 by FP-Radar

```
// Capture current time & visibility state.  
function An(e) {  
  var t = e.type,  
      n = {  
    PX38: getVisibilityState(t),  
    PX70: getCurrentTime()  
  };  
  return n;  
}
```
